

Serial No.: 09/745,965

Attorney Docket: 3373.1

AMENDMENTS

Amendments to the Specification:

The paragraph beginning on page 3, line 7 should be amended to read:

A computer implemented method for selecting nucleic acid probes ~~are~~ is provided. In some embodiments, the methods include steps of inputting quality scores and locations for a plurality (n) of candidate probes; selecting k number of probes from the n number of candidate probes, wherein the selected probes have a maximum aggregate adjusted quality score; wherein the adjusted quality score is based upon the quality score and the overlapping of the selected probes.
